EDUCATION

York University

Toronto, Ontario

B.A. in Information Technology

Expected Graduation, April 2027

- **Concentrations:** Information Systems & Software Development
- **Related Coursework:** Database Systems, Data Structures & Algorithms, Networks, Objects & Design, IT Project Management, Web Development, Object-Oriented Programming, Statistics & Applications

EXPERIENCE

Metro Compacter Service

Brampton, Ontario

Junior IT Associate

April 2026 – August 2026

- Managed IT service desk tickets, providing timely troubleshooting and resolution for hardware, software, network, and user support issues across the organization.
- Delivered L1–L2 technical support, resolving system errors, user access issues, and Microsoft 365/Active Directory account requests.
- Investigated recurring technical issues using root-cause analysis to improve system reliability and reduce repeat incidents.
- Documented workflows and resolutions, contributing to improved support processes and knowledge sharing.

Vortex Freight Systems

Mississauga, Ontario

Intern

July 2023 – April 2026

- Provided first-level IT support by setting up user accounts, configuring workstations, and resolving common hardware and software issues.
- Assisted employees with technical issues by troubleshooting user errors and escalating complex problems when required.
- Trained new team members on the system and workflow, helping them adapt quickly to daily operations.

Self-Employed Tutor

Brampton, Ontario

Computer & Math Tutor

November 2023 – April 2025

- Taught Python fundamentals, computer literacy, and digital problem-solving to students, fostering early interest in programming and logical thinking.
- Created personalized lesson plans covering coding basics such as variables, loops, functions, and debugging while adapting content to different learning styles and experience levels.
- Introduced students to essential digital tools, including Google Workspace and MS Office, reinforcing digital fluency and boosting confidence in using technology for academic and creative tasks.

PROJECTS

Data Analytics Pipeline

Database Developer

August 2025 – Sep 2025

- Built an ETL pipeline using **Python** and **SQL** to clean, transform, and load structured data for analysis and reporting.
- Automated data extraction and loading processes into a **relational database**, improving consistency and reducing manual effort.
- Optimized **SQL** queries using indexing and aggregation techniques to improve performance and generate insights.

Nearest Washroom Finder

Full-Stack Developer

Nov 2024 – Dec 2024

- Built a responsive location-based web app using **React.js** and **JavaScript**, enabling users to find nearby public bathrooms within a 1.5 km radius by integrating **OpenStreetMap's Overpass API** and geolocation tracking.
- Implemented asynchronous data fetching with **axios** and interactive map rendering with **Leaflet.js**, enhancing UX with dynamic markers, popups, and seamless cross-device performance.
